React Templates

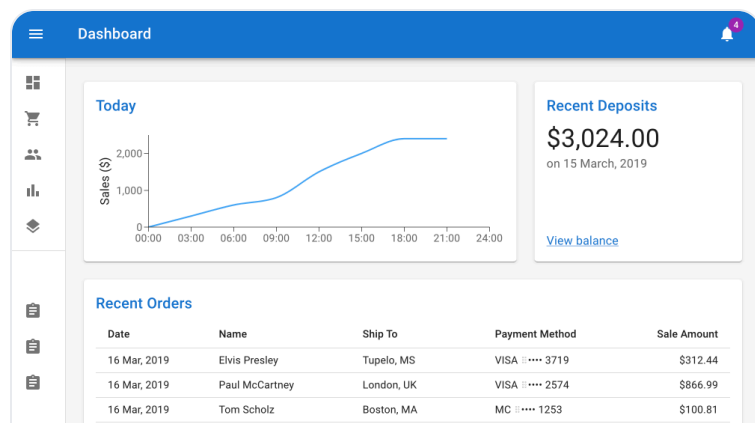

Browse our collection of free React templates to get started building your app with Material UI, including a React dashboard, React landing page, and more.

Free templates

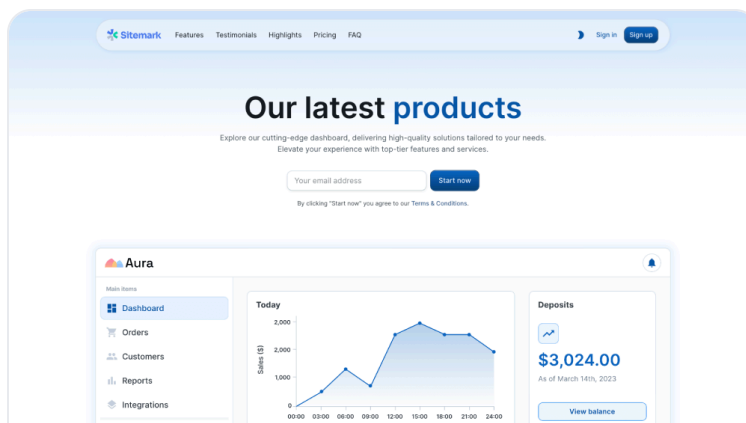

Our curated collection of free Material UI templates includes dashboards, landing pages, sign-in and sign-up pages, a blog, a checkout flow, and more. They can be combined with one of the [example projects](#) to form a complete starter.

Sections of each layout are clearly defined either by comments or use of separate files, making it simple to extract parts of a page (such as a "hero unit", or footer, for example) for reuse in other pages. For multi-part examples, a table in the README at the linked source code location describes the purpose of each file.

Dashboard

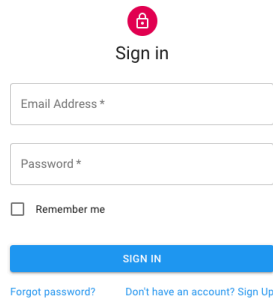

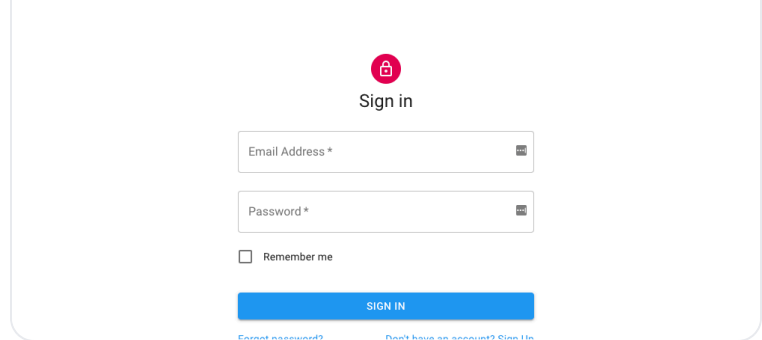

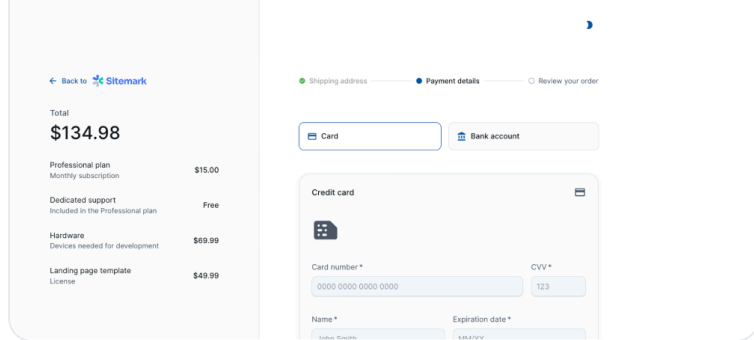

Contains a taskbar and a mini variant drawer. The chart is courtesy of Recharts.

[Live preview](#)[Source code](#)

Landing page

A responsive landing page layout with common sections found in marketing pages.

[Live preview](#)[Source code](#)

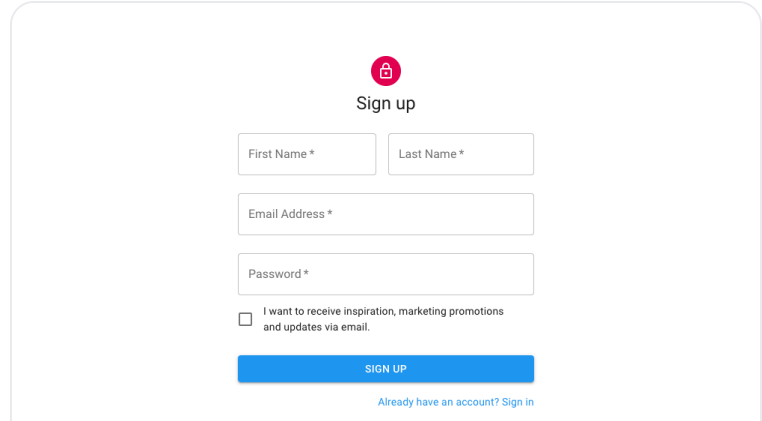

Sign-in side

A sign-in page with a two-column layout using text fields, buttons, and more.
