Roadmap

Keep up with ongoing projects and help shape the future of Material UI.

How we prioritize

Material UI is a community-driven project, meaning we usually pick the issues and suggestions that resonate the most with the community. Therefore, make sure to leave an upvote 👍 on [the GitHub issues](#) you are most interested in.

Additionally, we conduct annual [developer surveys](#) which also serve as key inputs for Material UI's roadmap. Your participation is invaluable—keep an eye on MUI's social media to catch the next survey and help shape the future of the library!

Keeping track of the roadmap

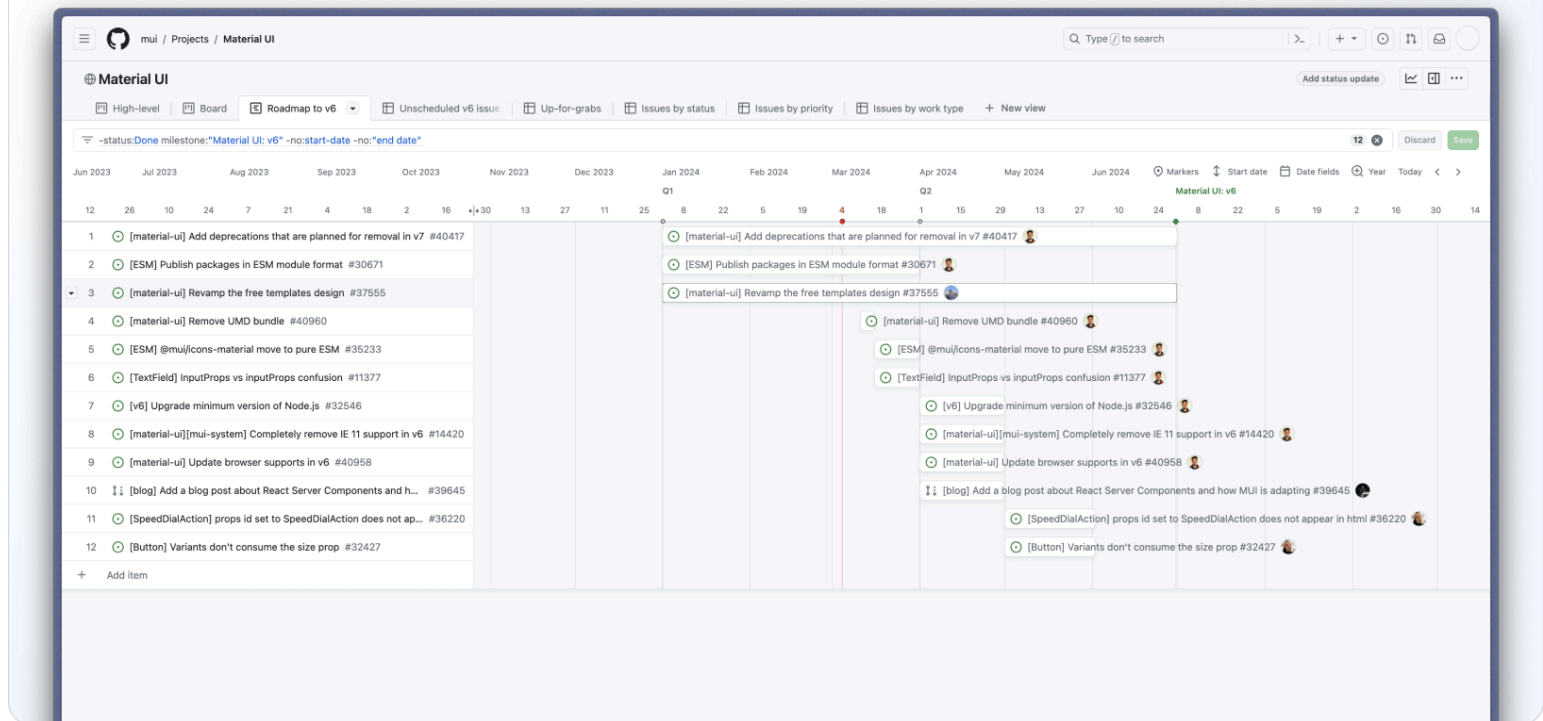

GitHub project

The Material UI GitHub project is where you can see the ongoing priorities for the library. We typically add umbrella issues to the project board after discussing them internally.

[Visit the Material UI project board](#) 🖱️

Milestones

We also create milestones within the Material UI repository to keep track of larger cycles. Check it out to keep up with ongoing progress and see which issues have been picked up for the stable release.
