

twinlab.Dataset.view

Dataset.view(*verbose=False*)

View (and download) a dataset that exists on the twinLab cloud.

Parameters:

verbose ([bool](#), *optional*) – Display information about the operation while running.

Return type:

[DataFrame](#)

Returns:

pandas.DataFrame containing the requested dataset.

Example

```
dataset = tl.Dataset("quickstart")
dataset.view()
```

	x	y
0	0.696469	-0.817374
1	0.286139	0.887656
2	0.226851	0.921553
3	0.551315	-0.326334
4	0.719469	-0.832518
5	0.423106	0.400669
6	0.980764	-0.164966
7	0.684830	-0.960764
8	0.480932	0.340115
9	0.392118	0.845795
