

twinlab.Emulator.view_train_data

Emulator.view_train_data(*verbose=False*)

View training data with which the emulator was trained in the twinLab cloud.

Parameters:

verbose ([bool](#), *optional*) – Display information about the operation while running.

Returns:

Dataframe containing the training data on which the emulator was trained

Return type:

[pandas.DataFrame](#)

Example

```
emulator = tl.Emulator("quickstart")
emulator.view_train_data()
```

	x	y
0	0.696469	-0.817374
1	0.286139	0.887656
2	0.226851	0.921553
3	0.551315	-0.326334
4	0.719469	-0.832518
5	0.423106	0.400669
6	0.980764	-0.164966
7	0.684830	-0.960764
