Dataset

The following functions are contained in the `twinlab.Dataset` class.

Constructor

`Dataset` (id)   A twinLab dataset that can be used for training an emulator online.

Upload data

`Dataset.upload` (df[, verbose])   Upload a dataset to the twinLab cloud so that it can be queried and used for training.

Explore data

`Dataset.view` ([verbose])	View (and download) a dataset that exists on the twinLab cloud.
`Dataset.summarise` ([verbose])	Show summary statistics for a dataset that exists on the twinLab cloud.
`Dataset.analyse_variance` (columns[, verbose])	Return an analysis of the variance retained per dimension.
`Dataset.analyse_input_variance` (columns[, ...])	⊘ ***Deprecated since version 2.5.0.***
`Dataset.analyse_output_variance` (columns[, ...])	⊘ ***Deprecated since version 2.5.0.***

Skip to main content

Delete data

`Dataset.delete`([verbose])   Delete a dataset that was previously uploaded to the twinLab cloud.
