twinlab.Dataset.delete

`Dataset.delete(verbose=False)`

Delete a dataset that was previously uploaded to the twinLab cloud.

It can be useful to delete an emulator to keep a user's cloud account tidy, or if dataset has been set up incorrectly and no longer needs to be used.

> **Parameters:**
> > **verbose** (*bool, optional*) – Display information about the operation while running.
>
> **Return type:**
> > None

Example

```
dataset = tl.Dataset("quickstart")
dataset.delete()
```
